PRODUCT INFORMATION and TRAINING .

For all our partners we are more than happy to support you with product information and product training for your staff involved in presenting, sell and giving training of Germa equipment.

Welcome to make your reservation

@-mail: bjorn@germa.se

EasyLift Shoulder lift support equipment is designed to take away heavy stress from your fingers and arms when lifting and carry a stretcher, evacuation chair, spine board or scoop board.

It is easy to use and low weight with the purpose it should be easy to bring with you as a paramedic, undertaker or other professionals that has to carry heavy weight of a patient, body or other material.

EasyLift use friction and is not "locked" on to the equipment that it is used on, easy to let go and safe to use and will spare many backs and arms from wear out.

EasyFix vacuum immobilisation system

New EasyFix Vacuum Splints

To make sure we can offer a premium line of vacuum immobilisation equipment that meet today's high requirement of modern design and very functional and reliable products we have introduced the EasyFix range. It looks very modern and has a new fresh colour combination that makes a difference.

EasyFix Splint is designed with well-proven construction and has all the requested features and benefits and more that your customers and users are looking for.
